

Problem 42c

How is it possible for a human to

“The simple answer is that I don’t know. What I do know is that the chassis is lovingly constructed from bonded aluminium, clothed in a perfectly formed, lightweight body. With a wanton 2.2i Ecotec aluminium engine, the

THE NEW VX220

have unnatural feelings towards a car?

resulting power to weight ratio is enough to make any serious driver (or scientist) very excited indeed. Oh how I thrilled at the sassy mid-engined, rear-wheel drive configuration that allowed me to throw it lustfully into every curve and, and... I'm sorry. If you want to know more, I suggest you call 0845 600 1500 or visit www.vauxhall.co.uk I'm having trouble remaining objective."
